

SYED NAQVI

TARGET ROLE: JUNIOR SOFTWARE DEVELOPER

South Kensington, UK/Willing to Relocate | **MOBILE:** 07864675484 | **EMAIL:** work.smadad@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

To the Recruiter:

With a First-Class Honours degree in Computing from De Montfort University and a range of projects and professional experiences that speak to my programming and problem-solving skills, I am ready to bring my expertise in C#, Java, Python, and .NET to your team.

During my time at De Montfort University, I not only excelled academically but also actively participated in DMU Hackers and the Esports Society, where I honed my teamwork and strategic thinking skills. These experiences, combined with my leadership role in various projects, have equipped me with a unique blend of technical skills and soft skills vital for a role in software development.

One of my key projects, Parkie - a Parking System Administration web and chatbot app, showcases my ability to lead a team and manage a full-stack development process. I was responsible for creating a user-friendly Flask-based web interface and a Django NLP AI chatbot, demonstrating my proficiency in Python and my knack for AI/ML applications. This project not only earned me the "Best Final Year Project Prize" but also underscored my capability to handle complex software solutions.

In my role as a Software Developer at Al-Madad Mills, I was involved in the entire software development life cycle, enhancing my skills in C#, ASP.NET, and SQL Server. This experience was pivotal in solidifying my understanding of practical software development, especially in an agile environment.

If you agree that an interview would be to our mutual benefit, please contact me at my mobile number or email address listed above at your earliest convenience.

Thank you for considering my application.

Warm Regards,

Syed Naqvi
